

In order to promote project / problem based learning in Computer Science classes, Department of Math and Computer Science is pleased to announce:

Computer Science Best Class-Project Award

Instructors of all computer science *undergrad* and *graduate* classes can nominate class projects (individual or team project) for the award. The project, done as a part of class requirement, should be outstanding, professional, unique, and creative.

A committee consisting of 2 or 3 CS faculty will review submitted projects and select up to 3 winning projects each academic year early May.

Each recipient will receive the following:

- Certificate of award
- \$200 gift card of recipient's choice, in case of individual project (If team project, the amount will be equally divided). This gift is donated by an anonymous donor.
- Recognition on Department webpage and Facebook page

The following information is requested to nominate a project by an instructor OR student(s) by 11:59pm on April 30th. (Note: self-nomination requires email endorsement by the class instructor)

- Title and one paragraph synopsis of the project
- Documentation in PDF
- YouTube video link of the public presentation in class is strongly recommended. (You may get help from eLearning, www.ltu.edu/elearning/video-requests.asp, for the video production)
- Links of any other web resources related to the class project

For questions or to nominate, please email Dr. CJ Chung (CS Best Class-Project Award Committee Chair) at cchung@LTU.edu
